

➤ **“Completion of a two-year curriculum in ornamental horticulture or landscape work ...”:**

A program that prepares students for careers in the nursery, landscaping, and floral industries and focusses on developing students’ knowledge, skill and experience working with plant material in multiple applications and fields. Students will develop competency in the following areas:

- Plant/Pest identification
- Plant physiology
- Soil science
- Plant reproduction
- Nursery production
- Floriculture
- Landscape design, installation, and maintenance
- Small engine repair (mechanics)
- Weed eradication
- Pest/disease control
