

“...including two years above the trainee level engaged in the collection, compilation, analysis and interpretation of data.”:

- **Collection of data** – systematic gathering of data for a particular purpose from various sources, including questionnaires, interviews, observation, existing records, and information systems.
- **Compilation of data** – the process of condensing information by classifying data into various categories or groups with the object of producing statistics (descriptive or inferential).
- **Analysis of data** – the process of evaluating data using analytical and logical reasoning to examine each component of the data provided.
- **Interpretation of data** – application of statistical procedures to analyze specific observed facts from a particular study and reach a conclusion.
